Contact No.: +91 8088124783

E-Mail Id: girishgowdasr428@gmail.com

Linkedin: <https://www.linkedin.com/in/girisha-s-r>

Career Objective:

I am a Computer Science Engineering graduate specializing in Artificial Intelligence and Machine Learning. I am eager to apply my skills in fullstack development and my theoretical knowledge of machine learning to real-world applications. I am currently enhancing my abilities through an internship and seeking further challenges to leverage my capabilities in a progressive organization

Educational Qualifications:

- B.E CSE (AIML) Engineering from Don Bosco Institute of Technology, Kumbalagodu, Bengaluru.
- Diploma in Automobile Engineering from P V P Polytechnic, Mallathalli, Bengaluru.
- Xth Class from SVN Standard high school, Hegganahalli cross, Bengaluru.

Projects:

- **Personal Portfolio Website (React.js + CSS)**

<https://github.com/Girishg0wda/personal-portfolio-website>

Created a responsive, single-page personal portfolio using React.js to showcase projects, skills, and experience. Implemented smooth navigation, project filtering, and interactive UI elements. Designed with custom CSS for a clean, modern look and optimized for mobile and desktop.

- **Clinic Front Desk Management System (Full Stack)**

<https://github.com/Girishg0wda/HealthFlow-Girsh-Edition>

Developed a full-stack web application for clinic front desk operations using React, Node.js, Express, and MongoDB. Built and integrated secure RESTful APIs for user authentication (JWT), queue updates, appointment management, and doctor profiles. Enabled real-time queue tracking and appointment scheduling. Designed responsive UI and implemented search/filter features for doctors by specialization and availability.

- Developed a major project on ‘**Cryptocurrency Price Prediction**’ using Python, incorporating machine learning algorithms to forecast price trends of cryptocurrencies like Bitcoin and Ethereum. Performed data preprocessing, feature engineering, and time-series analysis using libraries such as pandas, scikit-learn, and LSTM models in TensorFlow. Implemented visualizations to interpret prediction accuracy and market behavior. Enhanced model performance through hyperparameter tuning and cross-validation.
- Developed a mini project on “**Online Voting Machine**” using C++ for backend logic and HTML for the user interface. Implemented secure vote casting, candidate selection, and result calculation features. Focused on basic authentication and user-friendly interaction.

Skills & Tools:

- **Full Stack Development:** Proficient in **HTML, CSS, JavaScript, React.js** (Frontend), **Node.js, Express.js** (Backend), and **MongoDB** (Database) for building dynamic and scalable web applications.
Python: Familiar with core concepts like variables, data types, control structures, functions, file handling, and basic libraries such as pandas, matplotlib, and numpy.

Work experience & Certifications:

Web Development Intern

Okulr Techminds [Bengaluru, Karnataka]

04/2025 – Present

- Working on frontend and backend development using React.js, Node.js, and MongoDB
- Collaborating on real-world projects involving responsive UI design and REST API integration
- Gaining hands-on experience with tools like Postman, and Vite for modern development workflows
- HP LIFE online course on “Agile Project Management”.
- Infosys springboard certificate on “Python programming”.
- completed 4 weeks Offline Internship on “Python [AI/ML]” at Dotch Endeavours Pvt. Ltd.

Declaration:

I hereby declare that all the above furnished information is true to the best of my knowledge and belief.
