PROFILE

Computer Science Engineering graduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience in full-stack development and a strong foundation in robotics concepts and AI-driven automation. Skilled in applying machine learning algorithms and Python-based solutions to real-world challenges. Seeking opportunities to contribute in areas involving AI systems development, data-driven applications, and intelligent software solutions.

PROFESSIONAL EXPERIENCE

Okulr Techminds — Web Development Intern (Apr 2025 - Aug 2025)

- Worked on frontend and backend development using React.js, Node.js, and MongoDB.
- Collaborated on real-world projects involving responsive UI design and REST API integration.
- Gained hands-on experience with tools like Postman and Vite for modern development workflows.

PROJECTS

Personal Portfolio Website

GitHub: <https://github.com/Girishg0wda/personal-portfolio-website>

Built a responsive single-page portfolio showcasing skills and projects. Implemented smooth navigation, filtering, and interactive UI.

Clinic Front Desk Management System

GitHub: <https://github.com/Girishg0wda/HealthFlow-Girsh-Edition>

Developed secure authentication (JWT), queue updates, and appointment management. Designed responsive UI with search and filter for doctor profiles.

Cryptocurrency Price Prediction

Applied ML models (LSTM, Regression) for Bitcoin/Ethereum price forecasting. Performed feature engineering, visualization, and hyperparameter tuning.

EDUCATION

Don Bosco Institute of Technology — B.E. in CSE (AIML)

P.V.P. Polytechnic — Diploma in Automobile Engineering

SVN Standard High School — SSLC

SKILLS

Programming & Development:

Python, JavaScript, HTML, CSS, React.js, Node.js, Express.js, MongoDB

AI & Machine Learning:

TensorFlow, scikit-learn, pandas, numpy, matplotlib, model training & evaluation, regression/classification models, neural networks, data preprocessing, feature engineering

Robotics & Automation (Basics):

Arduino & Raspberry Pi fundamentals, IR/Ultrasonic sensor interfacing, motor control, embedded C basics, IoT device integration, automation logic design, sensor-based data collection, serial communication between hardware and AI modules

Tools & Platforms:

Git, Postman, Vite, Jupyter Notebook, VS Code, Google Colab

CERTIFICATIONS

- HP LIFE online course on 'Agile Project Management'
- Infosys Springboard Certificate on 'Python Programming'
- Completed 4-week offline internship on 'Python [AI/ML]' at Dotch Endeavours Pvt. Ltd.
