## PROFESSIONAL SUMMARY

AI & Machine Learning and Full Stack Developer with hands-on experience building scalable web applications using Django, React.js, Node.js, and MongoDB. Strong proficiency in Python programming and machine learning model development using libraries such as TensorFlow, Scikit-learn, Pandas, and NumPy. Experienced in developing REST APIs, JWT authentication systems, and data-driven dashboards for modern applications. Skilled in applying machine learning algorithms including Random Forest, SVM, Logistic Regression, Decision Trees, and Naive Bayes for predictive analytics and fraud detection systems. Passionate about leveraging Artificial Intelligence and Machine Learning techniques to build intelligent, scalable, and efficient software solutions.

## TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, SQL, HTML, CSS
- Frameworks & Libraries: Django, React.js, Node.js, Express.js, TensorFlow, Scikit-learn, Pandas, NumPy
- Databases: MongoDB, SQLite
- Tools: Git, Postman, VS Code, Jupyter Notebook, Google Colab, Vite
- Concepts: REST APIs, JWT Authentication, OOP, Data Structures, Agile, ML Algorithms
- **AI & MACHINE LEARNING EXPERTISE**
  - Machine Learning Algorithms: Random Forest, Support Vector Machine (SVM), Logistic Regression, Decision Trees, Naive Bayes
  - Data Processing & Analysis: Data Cleaning, Feature Engineering, Data Visualization
  - Model Development: Model Training, Hyperparameter Tuning, Cross Validation, Model Evaluation
  - Libraries & Tools: TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib
  - Concepts: Supervised Learning, Classification Models, Predictive Analytics, Fraud Detection Systems

## PROJECT EXPERIENCE

### Task & Productivity Tracker | Django, SQLite

- Developed a full-stack productivity tracking system with secure user authentication.
- Implemented role-based access control for different user permissions.
- Built analytics dashboard for monitoring task completion and productivity.
- Added Excel export functionality for reporting and data management.

### Clinic Front Desk Management System | MERN Stack

- Developed appointment scheduling and queue management system.
- Implemented JWT-based authentication for secure access.
- Built admin dashboard for managing appointments and patient flow.
- Integrated MongoDB for scalable data storage.

### Cryptocurrency Price Prediction System | Machine Learning, Python

- Developed a machine learning model to predict cryptocurrency price trends using historical market data.
- Performed data preprocessing, feature engineering, and normalization to improve model accuracy.
- Implemented algorithms such as Random Forest, Logistic Regression, and Support Vector Machine (SVM).
- Used Pandas and NumPy for large dataset manipulation and analysis.
- Visualized price trends and prediction results using Matplotlib.
- Evaluated models using accuracy, precision, recall, and confusion matrix.
- Improved performance through hyperparameter tuning and cross-validation.

### Money Laundering Detection System | Machine Learning, Python

- Developed a fraud detection system to identify suspicious financial transactions.
- Processed transaction datasets to detect patterns related to fraudulent activities.
- Applied algorithms such as Decision Trees, Naive Bayes, and Random Forest for anomaly detection.
- Performed preprocessing including missing value handling, scaling, and encoding.
- Used feature selection techniques to improve performance and reduce false positives.
- Created visualizations using Pandas and Matplotlib to analyze suspicious behavior.

- Evaluated performance using precision, recall, F1-score, and ROC curves.

## INTERNSHIP EXPERIENCE

- Web Development Intern – Okulr Techminds (Apr 2025 – Aug 2025): Worked on full-stack development using React.js, Node.js, MongoDB and REST APIs.
- Data Science Intern – Unified Mentor (2025): Developed ML models and performed data analysis and visualization.
- Full Stack Web Development Intern – Dotch Endeavours Pvt. Ltd. (2023): Worked on frontend and backend development tasks.
- Python Programming Intern – Institutional Internship Program: Strengthened Python programming and problem-solving skills.

## EDUCATION

- B.E. Computer Science & Engineering (AI & ML) – Don Bosco Institute of Technology, Bengaluru – CGPA: 7.35 (2025)
- Diploma in Automobile Engineering – PVP Polytechnic, Bengaluru – 70% (2021)
- SSLC – SVN Standard High School

## CERTIFICATIONS

- Agile Project Management – HP LIFE
- Python Programming – Infosys Springboard
- Python (AI/ML) Internship – Dotch Endeavours Pvt. Ltd.
