PROFESSIONAL SUMMARY

Data Analyst and Full Stack Developer with hands-on experience in data extraction, analysis, and visualization using Python, Pandas, NumPy, and Matplotlib. Experienced in developing machine learning models for pattern detection and predictive analytics across financial and transactional datasets. Skilled at transforming raw data into actionable insights through structured reporting and visual storytelling. Familiar with dashboard development and data-driven decision support. Eager to bring analytical capabilities and technical skills to Accenture's Engineering Services team.

TECHNICAL SKILLS

- **Data Analysis & Visualization:** Python, Pandas, NumPy, Matplotlib, Scikit-learn
- **Dashboarding & Reporting:** Matplotlib dashboards, Excel reporting, Data storytelling
- **Machine Learning:** Random Forest, SVM, Logistic Regression, Decision Trees, Naive Bayes
- **Programming Languages:** Python, JavaScript, SQL, HTML, CSS
- **Frameworks & Libraries:** Django, React.js, Node.js, Express.js, TensorFlow
- **Databases:** MongoDB, SQLite, SQL
- **Tools & Platforms:** Git, Postman, VS Code, Jupyter Notebook, Google Colab, Netlify
- **Concepts:** REST APIs, JWT Authentication, Agile, OOP, Data Structures, Feature Engineering

KEY PROJECTS

Cryptocurrency Price Prediction System | Python, Machine Learning

Data Analysis & Predictive Modeling Project

- Extracted and analyzed historical cryptocurrency market data to identify pricing trends and patterns — directly aligned with data synthesis in manufacturing/quality domains.
- Performed data preprocessing including missing value handling, feature engineering, normalization, and scaling to improve model accuracy.
- Applied and compared multiple ML algorithms: Random Forest, Logistic Regression, and SVM for predictive trend analysis.
- Visualized price trends, model performance, and prediction results using Matplotlib and Pandas — creating clear, insight-driven charts for reporting.
- Evaluated models using accuracy, precision, recall, F1-score, and confusion matrix; improved results through hyperparameter tuning and cross-validation.

Money Laundering Detection System | Python, Machine Learning

Fraud Detection & Anomaly Analysis Project

- Developed a fraud detection system to identify suspicious financial transactions — paralleling quality control data analysis in engineering domains.
- Processed large transaction datasets to detect anomalies using Decision Trees, Naive Bayes, and Random Forest algorithms.
- Applied preprocessing techniques including missing value handling, encoding, and feature selection to reduce false positives and improve detection accuracy.
- Created data visualizations using Pandas and Matplotlib to surface suspicious behavioral patterns for reporting and decision support.
- Evaluated model performance using precision, recall, F1-score, and ROC curves — translating findings into structured analytical outputs.

Task & Productivity Tracker | Django, SQLite

Analytics Dashboard Development Project

- Built an analytics dashboard for monitoring task completion rates and productivity metrics — experience directly applicable to Power BI/Looker Studio-style reporting.
- Implemented role-based access control and secure authentication for data governance.
- Added Excel export functionality enabling structured data reporting for stakeholders.

INTERNSHIP EXPERIENCE

Full Stack Development Intern — Okulr Techminds

Apr 2025 – Aug 2025

- Worked on full-stack development using React.js, Node.js, MongoDB and REST APIs. Built data-driven forms and contributed to dashboard components for a Clinic Front Desk Management System.

Data Science Intern — Unified Mentor

2025

- Developed ML models for data analysis tasks. Performed data cleaning, feature engineering, and visualization using Python, Pandas, and Matplotlib.

Full Stack Web Development Intern — Dotch Endeavours Pvt. Ltd.

2023

- Worked on frontend and backend development tasks across multiple client projects.

Python Programming Intern — Institutional Internship Program

2023

- Strengthened Python programming, data structures, and analytical problem-solving skills.

EDUCATION

B.E. Computer Science & Engineering (AI & ML) — Don Bosco Institute of Technology, Bengaluru

CGPA: 7.35 | Graduated 2025

Diploma in Automobile Engineering — PVP Polytechnic, Bengaluru

70% | 2021

CERTIFICATIONS

- Agile Project Management — HP LIFE
- Python Programming — Infosys Springboard
- Python (AI/ML) Internship — Dotch Endeavours Pvt. Ltd.
